These data are presented for informational purposes only and are not intended as a legal opinion regarding dental practice in any state. DANB confers with each state’s dental board at least annually regarding the accuracy and currency of this information. To verify, or if you have any questions, please contact your state’s dental board.

NELDA®, CDA®, COA®, CRFDA®, CPFDA®, and COMSA®, are registered certification marks of the Dental Assisting National Board, Inc. (DANB). DANB®, Dental Assisting National Board®, RSH®, ICE®, and Measuring Dental Assisting Excellence® are registered service marks of DANB. CERTIFIED DENTAL ASSISTANT™ is a certification mark of DANB.
To perform **expanded functions** in the state of Pennsylvania under the direct supervision of a licensed dentist, a dental assistant must hold a state certification as an Expanded Function Dental Assistant (EFDA).

To obtain this state certification, one must:

- Graduate from an expanded function dental assisting program at a two-year college or other state board-approved program which offers an associate degree **OR**
- Graduate from a CODA-accredited dental hygiene school, which requires the successful completion of at least 75 hours of clinical and didactic instruction in restorative functions **OR**
- Complete a state certification program in expanded function dental assisting of at least 200 hours of clinical and didactic instruction from either a CODA-accredited dental assisting program or a state board-approved dental assisting program **AND**
- Apply for state certification in expanded functions to the Pennsylvania State Board of Dentistry **AND**
- Pass a Pennsylvania board-acceptable written exam

A **dental assistant** in Pennsylvania may perform basic supportive dental procedures specified by the state dental practice act (see opposite page) under the direct supervision of a licensed dentist.

There are no education or training requirements for this level of dental assistant.

---

### Education/Training/Credential Required

**Expanded Functions Dental Assistant (EFDA)**

- **Graduate from an expanded function dental assisting program at a two-year college or other state board-approved program which offers an associate degree.**
- **Complete a state certification program in expanded function dental assisting of at least 200 hours of clinical and didactic instruction from either a CODA-accredited dental assisting program or a state board-approved dental assisting program.**
- **Apply for state certification in expanded functions to the Pennsylvania State Board of Dentistry.**
- **Pass a Pennsylvania board-acceptable written exam.**

### Proposed Standardized National Job Titles (see below)

**DANB Certified Dental Assistant (CDA) or Registered Dental Assistant (RDA)**

**Dental Assistant**

**Entry Level Dental Assistant**

**Proposed Standardized National Job Titles**

- **Expanded Functions Dental Assistant (EFDA)**
- **DANB Certified Dental Assistant (CDA) or Registered Dental Assistant (RDA)**
- **Dental Assistant**
- **Entry Level Dental Assistant**

### Radiography Requirements

To legally operate dental x-ray equipment and perform dental radiographic procedures under the direct supervision of a dentist in the state of Pennsylvania, a dental assistant must:

- Pass the national DANB Radiation Health and Safety (RHS) exam

Evidence of having passed the required exam **should be retained by the dental assistant and the licensed dentist as evidence of the individual’s authority to perform radiologic procedures.**

**Note: Prior to Dec. 12, 2009, a Pennsylvania-specific radiography exam administered by an entity other than DANB was required. If a dental assistant qualified to perform radiography procedures by taking the former Pennsylvania exam prior to Dec. 12, 2009, both the dental assistant and his/her employer should retain evidence of the dental assistant’s passing the former Pennsylvania radiography exam.**

The following functions are **not** permitted by any level of dental assistant:

- 46. Take impressions other than for study models, diagnostic casts or athletic appliances
- Complete or limited examination, diagnosis and treatment planning
- Surgical or cutting procedures of hard or soft tissue
- Prescribing drugs, medicaments or work authorizations
- **Final inspection and approval of restorative and other treatment which affects occlusion and any necessary occlusal adjustments.**
- **Pulp capping, pulpotomy and other endodontic procedures.**
- Placement and intraoral adjustments of fixed and removable prosthetic appliances
- Administration of local anesthesia, parenteral or inhalational sedation, nitrous oxide analgesia or general anesthesia.

---

The ADAA/DANB Alliance developed a listing of standardized job titles (left) based on its national Core Competencies Study conducted from 2002-2005.

The same study utilized a list of 70 job functions which were determined to be representative of a broad range of dental assisting core competencies.

Functions in this state that relate to the national DANB/ADAA Core Competencies Study are numbered to the right, using language directly from this state’s dental practice act. (The numbers correspond to the study’s task numbering system.)

Functions listed with bullets are part of this state’s practice act but are not specific matches to DANB/ADAA research.

These state templates reflect the work done by the ADAA/DANB Alliance to support a uniform national model for one set of dental assisting tasks, levels and requirements, which will serve as a viable career ladder for dental assistants.

### Under Direct Supervision*

- 9. Perform coronal polishing
- 12. Placing and condensing amalgam restoration and other restorative materials
- 18. Perform fluoride treatments, including fluoride varnish
- 27. Placing and removing rubber dams

- 33. 40. Placing and finishing composite resin restorations and/or sealant material or both
- 34. Applying cavity liners and bases
- 45. Placing and removing matrices
- 51. Carving and contouring amalgam restorations

- Placing and removing wedges
- Taking impressions of teeth for study models, diagnostic casts or athletic appliances
- All duties designated to Dental Assistants, under the same levels of required supervision

---

**DANB’s Note on Allowable Dental Assisting Functions**

In the state of Pennsylvania, all dental assistants may

- Perform infection control and occupational safety procedures
- Perform other duties not specified by this state’s dental practice act

At this time, DANB cannot list all allowable dental assisting functions for each state because some states’ dental practice acts outline very specific allowable functions, while others outline only prohibited functions and some contain minimal or no regulation of dental assisting duties.

---

*Direct Supervision:* A dentist is in the dental office or treatment facility, personally diagnoses the condition to be treated, personally authorizes the procedure and remains in the dental office or treatment facility while the procedure is being performed and, before dismissal of the patient, evaluates the work performed by the expanded function dental assistant.
Appendix A: Numbering System for Dental Assisting Functions

The following list of 70 dental assisting tasks was developed by the ADAA/DANB Alliance as part of a study of dental assisting core competencies conducted between 2002 and 2005. These selected tasks were determined to be representative of a broad range of dental assisting core competencies.

The numbered functions listed in the preceding state charts correspond to functions that were included in the DANB/ADAA core competencies study and use language directly from the state’s dental practice act. The numbers are provided to facilitate comparison between and among states. Functions listed with bullets in the preceding charts are part of the state’s practice act but are not specific matches to the functions that were included in the 2002-2005 study.

1. Perform mouth mirror inspection of the oral cavity
2. Chart existing restorations or conditions
3. Phone in prescriptions at the direction of the dentist
4. Receive and prepare patients for treatment, including seating, positioning chair, and placing napkin
5. Complete laboratory authorization forms
6. Place and remove retraction cord
7. Perform routine maintenance of dental equipment
8. Monitor and respond to postsurgical bleeding
9. Perform coronal polishing procedures
10. Apply effective communication techniques with a variety of patients
11. Transfer dental instruments
12. Place amalgam for condensation by the dentist
13. Remove sutures
14. Dry canals
15. Tie in archwires
16. Demonstrate knowledge of ethics/jurisprudence/patient confidentiality
17. Identify features of rotary instruments
18. Apply topical fluoride
19. Select and manipulate gypsums and waxes
20. Perform supragingival scaling
21. Mix dental materials
22. Expose radiographs
23. Evaluate radiographs for diagnostic quality
24. Provide patient preventive education and oral hygiene instruction
25. Perform sterilization and disinfection procedures
26. Provide pre- and post-operative instructions
27. Place and remove dental dam
28. Pour, trim, and evaluate the quality of diagnostic casts
29. Size and place orthodontic bands and brackets
30. Using the concepts of four-handed dentistry, assist with basic restorative procedures, including prosthodontics and restorative dentistry
31. Identify intraoral anatomy
32. Demonstrate understanding of the OSHA Hazard Communication Standard
33. Place, cure and finish composite resin restorations
34. Place liners and bases
35. Place periodontal dressings
36. Demonstrate understanding of the OSHA Bloodborne Pathogens Standard
37. Take and record vital signs
38. Monitor vital signs
39. Clean and polish removable appliances and prostheses
40. Apply pit and fissure sealants
41. Prepare procedural trays/armamentaria set-ups
42. Place orthodontic separators
43. Size and fit stainless steel crowns
44. Take preliminary impressions
45. Place and remove matrix bands
46. Take final impressions
47. Fabricate and place temporary crowns
48. Maintain field of operation during dental procedures through the use of retraction, suction, irrigation, drying, placing and removing cotton rolls, etc.
49. Perform vitality tests
50. Place temporary fillings
51. Carve amalgams
52. Process dental radiographs
53. Mount and label dental radiographs
54. Remove temporary crowns and cements
55. Remove temporary fillings
56. Apply topical anesthetic to the injection site
57. Demonstrate understanding of the Centers for Disease Control and Prevention Guidelines
58. Using the concepts of four-handed dentistry, assist with basic intraoral surgical procedures, including extractions, periodontics, endodontics, and implants
59. Monitor nitrous oxide/oxygen analgesia
60. Maintain emergency kit
61. Remove permanent cement from supragingival surfaces
62. Remove periodontal dressings
63. Place post-extraction dressings
64. Fabricate custom trays, to include impression and bleaching trays, and athletic mouthguards
65. Recognize basic medical emergencies
66. Recognize basic dental emergencies
67. Respond to basic medical emergencies
68. Respond to basic dental emergencies
69. Remove post-extraction dressings
70. Place stainless steel crown

The following list of 70 dental assisting tasks was developed by the ADAA/DANB Alliance as part of a study of dental assisting core competencies conducted between 2002 and 2005. These selected tasks were determined to be representative of a broad range of dental assisting core competencies.

The numbered functions listed in the preceding state charts correspond to functions that were included in the DANB/ADAA core competencies study and use language directly from the state’s dental practice act. The numbers are provided to facilitate comparison between and among states. Functions listed with bullets in the preceding charts are part of the state’s practice act but are not specific matches to the functions that were included in the 2002-2005 study.

1. Perform mouth mirror inspection of the oral cavity
2. Chart existing restorations or conditions
3. Phone in prescriptions at the direction of the dentist
4. Receive and prepare patients for treatment, including seating, positioning chair, and placing napkin
5. Complete laboratory authorization forms
6. Place and remove retraction cord
7. Perform routine maintenance of dental equipment
8. Monitor and respond to postsurgical bleeding
9. Perform coronal polishing procedures
10. Apply effective communication techniques with a variety of patients
11. Transfer dental instruments
12. Place amalgam for condensation by the dentist
13. Remove sutures
14. Dry canals
15. Tie in archwires
16. Demonstrate knowledge of ethics/jurisprudence/patient confidentiality
17. Identify features of rotary instruments
18. Apply topical fluoride
19. Select and manipulate gypsums and waxes
20. Perform supragingival scaling
21. Mix dental materials
22. Expose radiographs
23. Evaluate radiographs for diagnostic quality
24. Provide patient preventive education and oral hygiene instruction
25. Perform sterilization and disinfection procedures
26. Provide pre- and post-operative instructions
27. Place and remove dental dam
28. Pour, trim, and evaluate the quality of diagnostic casts
29. Size and place orthodontic bands and brackets
30. Using the concepts of four-handed dentistry, assist with basic restorative procedures, including prosthodontics and restorative dentistry
31. Identify intraoral anatomy
32. Demonstrate understanding of the OSHA Hazard Communication Standard
33. Place, cure and finish composite resin restorations
34. Place liners and bases
35. Place periodontal dressings
36. Demonstrate understanding of the OSHA Bloodborne Pathogens Standard
37. Take and record vital signs
38. Monitor vital signs
39. Clean and polish removable appliances and prostheses
40. Apply pit and fissure sealants
41. Prepare procedural trays/armamentaria set-ups
42. Place orthodontic separators
43. Size and fit stainless steel crowns
44. Take preliminary impressions
45. Place and remove matrix bands
46. Take final impressions
47. Fabricate and place temporary crowns
48. Maintain field of operation during dental procedures through the use of retraction, suction, irrigation, drying, placing and removing cotton rolls, etc.
49. Perform vitality tests
50. Place temporary fillings
51. Carve amalgams
52. Process dental radiographs
53. Mount and label dental radiographs
54. Remove temporary crowns and cements
55. Remove temporary fillings
56. Apply topical anesthetic to the injection site
57. Demonstrate understanding of the Centers for Disease Control and Prevention Guidelines
58. Using the concepts of four-handed dentistry, assist with basic intraoral surgical procedures, including extractions, periodontics, endodontics, and implants
59. Monitor nitrous oxide/oxygen analgesia
60. Maintain emergency kit
61. Remove permanent cement from supragingival surfaces
62. Remove periodontal dressings
63. Place post-extraction dressings
64. Fabricate custom trays, to include impression and bleaching trays, and athletic mouthguards
65. Recognize basic medical emergencies
66. Recognize basic dental emergencies
67. Respond to basic medical emergencies
68. Respond to basic dental emergencies
69. Remove post-extraction dressings
70. Place stainless steel crown
An important consideration in the discussion of the delegation of tasks to dental assistants is that of supervision of dental assistants by their dentist-employers. The American Dental Association (ADA) has identified five levels of supervision for dental auxiliaries, including dental assistants, which it defines in its “Comprehensive Policy Statement on Allied Dental Personnel,” (2010: 505) which is part of its Current Policies, last updated in 2018. Note that “allied dental personnel” refers to dental assistants, dental hygienists, community dental health coordinators and dental laboratory technicians.

The five levels of supervision defined by the ADA are as follows:

**Personal supervision:** A type of supervision in which the dentist is personally operating on a patient and authorizes the allied dental personnel to aid treatment by concurrently performing a supportive procedure.

**Direct supervision:** A type of supervision in which a dentist is in the dental office or treatment facility, personally diagnoses and treatment plans the condition to be treated, personally authorizes the procedures and remains in the dental office or treatment facility while the procedures are being performed by the allied dental personnel and evaluates their performance before dismissal of the patient.

**Indirect supervision:** A type of supervision in which a dentist is in the dental office or treatment facility, personally diagnosed and treatment planned the condition to be treated, authorizes the procedures, and remains in the dental office or treatment facility while the procedures are being performed by the allied dental personnel, and will evaluate the performance of the allied dental personnel.

**General supervision:** A type of supervision in which a dentist is not required to be in the dental office or treatment facility when procedures are provided, but has personally diagnosed and treatment planned the condition to be treated, has personally authorized the procedures, and will evaluate the performance of the allied dental personnel.

**Public Health Supervision:** A type of supervision in which a licensed dental hygienist may provide dental hygiene services, as specified by state law or regulations, when such services are provided as part of an organized community program in various public health settings, as designated by state law, and with general oversight of such programs by a licensed dentist designated by the state.

Furthermore, the ADA's “Comprehensive Policy Statement on Allied Dental Personnel” stipulates that intraoral expanded functions should be performed by allied dental personnel “under the supervision of a dentist.”

Because the study of dental assisting core competencies undertaken by the ADAA/DANB Alliance did not address the question of supervision, the ADAA/DANB Alliance does not make any recommendations as to the levels of supervision that should be necessary for the delegation of the tasks included in the study to dental assistants. However, the ADAA/DANB Alliance believes it is important to call attention to the fact that, while the ADA has defined supervision levels in the aforementioned policy statement, which governs the ADA's own activities and the activities of its members, these definitions have not been uniformly adopted by the dental boards of every U.S. state or district.

**For the purposes of the attached charts, if a state's dental practice act specifically defines levels of supervision, the state-specific definition is noted in the footer of the second page of the state chart.**
